DETAILED ACTION

Response to Amendment

1. Applicant's arguments, in view of the amendment filed 12/11/07, with respect to claims 1 and 21 have been fully considered and are persuasive. The rejection of claims 1-25 has been withdrawn.

Allowable Subject Matter

2. Claims 1-25 are allowed.
3. The following is an examiner's statement of reasons for allowance: None of the prior art on record teaches the combination of subjectively and objectively rating each of a set of synthesized utterances, ascertaining a relationship between the subjective and objective scores and "altering the objective measure in a manner beyond only changing one or more weighting factors in the objective measure to provide a different function of textual information derived from the utterance so as to improve the relationship between the scores of the objective measure and subjective rating of the synthesized utterances." It would not have been obvious to one of ordinary skill in the art at the time of invention to modify the prior art on record to arrive at Applicant's invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Peng et al. ("Perceptually Optimizing the Cost Function for Unit Selection in a TTS System with One Single Run of MOS Evaluation") teaches altering the objective measure of synthesized speech based upon a subjective rating. Kim (U.S. Pat. 7,305,341) teaches updating an objective measure of speech by analyzing the distortions in speech. Chu et al. (U.S. Pat. 7,328,157) teaches comparing objective and subjective scores of synthesized speech to determine the naturalness of speech.
